www.linstar.com

LINSTAR is a systems integrator specializing in ICS, access control, video surveillance and positive ID. LINSTAR is the leading provider of portable credentialing and accountability solutions for emergency response organizations across New York State. NY State depends on LINSTAR for identification and interagency interoperability at emergency scenes - including FIPS 201, FRAC and NIMS compliant accountability tags and the hardware and software to read them! Systems used for incident management, patient and evacuee tracking, asset and clinic management are some of the many EMO solutions available from LINSTAR.

LINSTAR also is a NYS Certified WBE and all LINSTAR solutions are available on NYS Contract.

VOICE & DATA SYSTEMS
CONTINUUM

"Continuum Voice & Data Systems specializes in office automation solutions for business."

**2401 Burnet Ave
Syracuse, NY 13206**

**800-933-0180
315-433-0180
315-437-9993 Fax**

We are called Continuum because we capture, handle, manipulate, translate, store, and retrieve all forms of data in a fashion that is seamless, infinitely flexible, future-friendly, and continuous in its ability to adapt to — and improve — the way you do business.

IamResponding.com lets you know immediately who is responding to your calls and dispatches, where they are responding, and when they will be responding. This saves critical time, and reduces response times, for fire departments, EMS agencies, SAR and technical rescue teams, and any other incident response teams when responding to emergencies.

With IamResponding.com, you will:

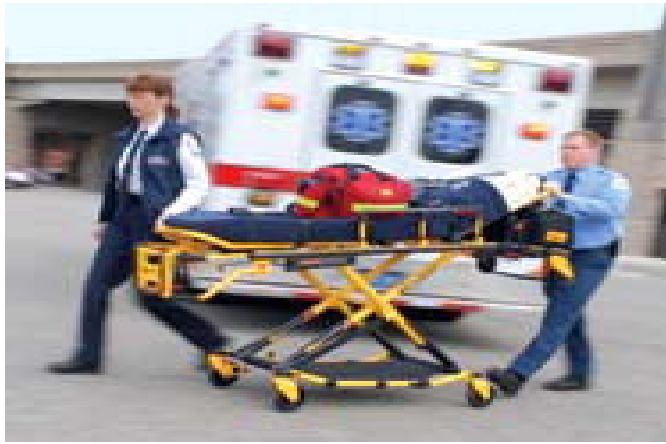

- Know immediately if you have a full crew on the way, or if you need to page additional personnel;
- Stop waiting for members who are not on their way, and stop leaving the station just as others are coming around the corner;
- Know who is responding to the station, scene or any other location; and
- Reduce response times.

IamResponding.com includes many other great features, including: an instant mass-messaging system for enhanced communications within your department or team; web-based scheduling; apparatus status tracking, expiration date tracking, a fully interactive calendar, and much more!

Fully automated and web-based - *no software or unique hardware required!*

Emergency support teams

When an emergency unfolds, Grainger quickly mobilizes internal and external resources to assist troubled communities.

Extended hours and personnel

During major emergencies, [Grainger branches](#) stay open 24 hours (unless curfews are imposed by local authorities). Additional personnel are brought in to take orders, assist customers at the counter, and load trucks. Our Call Centers are able to accept phone orders 24 hours a day.

Essential product availability

Within hours of a disaster, trailers containing critical products are dispatched to support the relief effort. Contingency plans with our suppliers allow us to provide additional equipment quickly.

LaBriute Meals is an exciting [product line](#). **LaBriute** has become a leading force in the ever expanding Kosher food industry. Our raison d'être is the belief that the Kosher consumer is no less entitled to the latest opportunities and conveniences available to the broader consumer market. Hence, for close to a decade now, **LaBriute Meals** has stood at the forefront of this emerging market, integrating contemporary innovations in food production, packaging and preparation technologies into the Kosher food sector.

LaBriute's meals are wholesome and nutritious, and our unique retorting process has absolutely no effect on the taste or texture of the food. The flameless food heater is also

100% safe for use anywhere.

While the occurrence of emergencies may be inevitable, government can take direct actions to plan to reduce or prevent an emergency before it occurs and to mitigate or minimize the impacts of events that do occur. To reduce the overall impact when an incident occurs, businesses must review their vulnerabilities, generate lists of needed improvements, and implement these improvements to effectively mitigate the threats posed.

E & E's strength in meeting the challenges of emergency mitigation and prevention lies in the breadth of our multidisciplinary staff and resources. www.ene.com

www.Ratheon.com

The Department of Security, Fire, and Emergency Management brings together three allied fields of study: fire science, emergency management, and security. The integration of these three disciplines provides the basis for establishing the essential safety and security needs in today's world. A variety of undergraduate programs are available to meet the needs of students who wish to pursue careers in the fields of fire protection, firefighting, and security management. Coursework in the fire science field includes technical classes on topics such as the design of water-based suppression systems, fire behavior, and building construction. For those who wish to pursue a career in the fire service, we offer several fire service management classes. We also offer up-to-date courses in the security field as well, including classes on the security of computers and their data as well as classes in security management. In addition, our one-of-a-kind Protection allows students to specialize in one of the following areas: fire protection, security management, or emergency management - while still completing coursework in the other two disciplines to provide a well-rounded understanding of this unique field of study.
